

Water conservation

WATER CONSERVATION

Water is the most needed resource which is highly reducing owing to Global Warming. So it is the duty of each and every institution to preserve the water resources through proper planning. Our institution plans water management in an effective way through various ways like

- 1. Rain Water Harvesting**
- 2. Borewell**
- 3. Water Sprinkler**
- 4. RO Plant**
- 5. Effective Water Distribution System**
- 6. Sewage Treatment Plant**

RAIN WATER HARVESTING

BOREWELL

WATER SPRINKLER
